

Goal Management Training Information Letter

Dear Potential Participant,

The PTSR program has agreed to participate in the **Goal Management Training** project conducted by Dr. Margaret McKinnon at Homewood Research Institute, in Guelph, ON. You are being invited to participate in this study, which aims to examine if a cognitive training program called Goal Management Training (GMT) reducing cognitive difficulties and improving every-day functioning in individuals with affective disorders (including post-traumatic stress disorder (PTSD)).

Participation in this study is voluntary. In order to determine whether or not you want to take part in this research study, you should understand what is involved and the potential risks and benefits. Please take your time to review this letter of information. You may discuss it with your friends, family, or members of your clinical care team before making your decision.

Why is this research being done?

Research has shown that individuals with PTSD often experience difficulties in many parts of cognitive functioning, like memory, learning, and attention. Such difficulties can have negative impacts, including less productivity at work or home and changes in social functioning. At present, very little research has been done to investigate whether cognitive difficulties can be targeted through a specific treatment approach. In this study we plan to investigate the effectiveness of an approach known as Goal Management Training (GMT) in reducing cognitive difficulties and improving day-to-day functioning (i.e., work or social functioning) in individuals with PTSD. Should this study be successful, it has the potential to have a positive impact on people with these disorders, their families, and society. Specifically, if we demonstrate that GMT can reduce difficulties in cognitive functioning and improving day-to-day functioning in the study group, we can expect that it would also be successful for others with PTSD.

What are the possible risks and discomforts?

Your participation in this study will include disclosure of personal information regarding your symptoms and difficulties related to PTSD and your history of exposure to traumatic events. This may cause you to feel embarrassed, uncomfortable, or become distressed. You are not required to answer any questions if you do not wish to and the research team will make every effort to minimize these risks.

How to Participate:

If you are interested in receiving more information, please fill out the contact form. A research team member will contact you to see if you are eligible to participate. Completing the contact form does not mean you have given consent to participate.

Questions:

If you have any questions about the study please contact Dr. Margaret McKinnon at 519-824-1010 ext. 2498.

If you have any questions regarding your rights as a research participant, you may contact Dr. Steve Abdool, Bioethicist & Director, Regional Centre for Excellence in Ethics, Homewood Health Centre at SAbdool@homewoodhealth.com or (519) 824-1010 Ext. 2118.

If I do not want to be contacted by anymore I can let HRI know via telephone 519-824-1010 ext.2180 or email ELevitt@homewoodhealth.com

Consent to Contact

My signature on this consent form means:

- I agree that Homewood Research Institute (HRI) can contact me using the telephone number provided to inquire about participating in the Goal Management Training research project.
- I understand that my signature below does not mean I am a participant in a project
- I understand if I do not want to be contacted anymore I can let HRI know by contacting 519-824-1010 ext.2180 or ELevitt@homewoodhealth.com
