

# Introducing AI-SUPPORTED LEARNING with All Day TA

Engaged, confident learning

The **Public Services Health and Safety Association (PSHSA)** has enhanced our training courses with an **AI teaching assistant, All Day TA**. This AI teaching assistant helps learners engage more deeply with course content by providing:

**Plain-language explanations** based on PSHSA expert-approved materials

**A private space** to ask questions and explore concepts during the course

**Real-time support** to reinforce understanding and application

The ability to **revisit learning** after the course to support real-world use

**Multi-language support** to improve accessibility and comprehension

## Access to trusted expert-approved content

All Day TA's AI Teaching Assistant draws answers exclusively from PSHSA-approved content—never the open internet. All of our content is closely reviewed and updated as legislation changes, so learners get accurate, information.

## Continued access after the course

Training doesn't have to end with the certificate. Learners retain access to All Day TA after course completion and can refer to course concepts, plan next steps, or clarify understanding.

## Reinforce and strengthen learning outcomes

Learners ask All Day TA questions they wouldn't normally raise in class. The confidence to clarify without judgement, in their own language, is what turns required training into engaging experiences that build knowledge retention.
